Forecast for Wednesday 19 Apr 2023

Weather:. Breezy, with early areas of cloud, perhaps with an odd spot of drizzle, clearing westwards during the morning to leaving periods of sunshine by lunchtime. This will be accompanied by strengthening winds that may approach gale in exposure into the evening.

Chance of cloud-free hill tops above 600m: 20% improving 90%

Low Cloud and visibility: Visibility very good in the main given relatively dry air, although hampered over higher ground in extensive cloud above 400 metres at first – this clearing westwards by lunchtime.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early conditions perhaps deceptive for the day as a whole, with the strengthening wind perhaps masking the effects of moderate UV in sunny spells, as well as the wind presenting a hazard in itself.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Wed 19 Apr 2023	0mm	0mm	0.2mm

Forecast for Thursday 20 Apr 2023

Weather: Early areas of cloud should soon clear to leave a fine and largely sunny day, albeit with continuing strong winds. There is increasing uncertainty in these conditions seeing out the whole day, with high cloud at least perhaps invading from the east into the evening.

Maximum wind: East or northeasterly 40mph.

Chance of cloud-free hill tops above 600m: 90%

Low Cloud and visibility: Very good visibility, with fleeting low cloud in places at 500 metres soon dispersing.

Temperature: **Valleys:** Zero Celsius becoming plus 14.
At 600m: Plus 4 Celsius.
Freezing level: Around the highest ground but soon rising comfortably clear.
